ABSTRACT OF THE DISCLOSURE

A method for scheduling manufacture of an item in a factory which includes
planning a time for manufacturing an item so as to have the manufacture of the item
15 complete during a desired shipping window, determining the desired shipping
window so as to allow the item to be shipped via a lower cost shipping method while
arriving at a destination as if shipped via an expedited shipping method, and
determining a carrier service for shipping the item so as to enable the item to be
shipped via a lower cost shipping method while arriving at a destination as if shipped
20 via an expedited shipping method.
